

Request to Change Level of Degree within the Same Major

Instructions: Use this form only if you will not be completing your current degree program. By filling out this form, you are indicating your intent to change from one degree to another degree in the same major (such as from PhD to master's level) without completing your current degree. If you wish to begin or add a new degree and you will complete your current program, you must fill out a new application form.

Please check here: I will not complete my current degree. I want to change to a new degree in the same major.

Please note that you must sign this form in order for your request to be processed.

Please read: All degree-seeking applicants must have on file official scores on a standardized graduate-level test such as Graduate Records Examination (GRE) or Miller Analogies Test (MAT).

Caution: If you have been awarded a fellowship (Lever, DAF, etc.) or graduate assistant position based on your degree program, changing your degree program may render you ineligible to continue to receive such an award.
