Program Changes Pending Approval from Graduate Committee

Code	Field	Old Value	New Value
ACCTPH	Scheduled Program Review Date	NA	2021-2022
	Description and justification of the request	The numbers on three courses were updated to 6000-level status and I swapped out the old course numbers for the new ones.	- Modified text describing the program - Deleted text related to seminar descriptions - Combined the summer paper/research requirements (ACCT 636V, Special Problems in Accounting) with required courses. - Deleted the following courses elective options: Select at least two courses from the following: ECON 6223 Microeconomic Theory II ECON 6633 Econometrics III ECON 6713 Industrial Organization ISYS 5623 Multivariate Analysis ISYS 5613 Business Applications of Nonparametric Techniques ISYS 5723 Advanced Multivariate Analysis MKTG 6433 Seminar in Research Methods STAT 5313 Regression Analysis There are now 15 hours to be selected in consultation w/ program director because there tends to be quite a bit of variability in these course offerings. - Changed the language from comprehensive examinations to candidacy examinations - Clarified total hour requirements - Clarified minimum of 72 graduate hours beyond the bachelors and 42 graduate hours beyond the master's degree. To align and clarify PhD program requirements to meet ADHE standards.

	Program Goals and Objectives	N/A	<p>1. Possess deep knowledge of a specialty area within electrical engineering in order to be recognized as an expert or innovator in that specialty. Graduates should also be competent in related areas of electrical engineering, engineering, science, and mathematics which impact performance in their specialty areas.</p> <p>2. Formulate a project plan, execute such a plan, generate and analyze results.</p> <p>3. Communicate effectively using both oral and written presentations.</p> <p>4. Be prepared for successful careers in industry, government, or academia.</p> <p>5. Possess skills required for life-long learning and professional development.</p> <p>6. Appreciate the importance of professional responsibility to society in such areas as the environment, social issues, and safety, and should be committed to ethical conduct in all areas.</p> <p>6. Appreciate the value of leadership service.</p>
	Learning Outcomes	N/A	<p>1. Apply knowledge of engineering, science, and mathematics to analyze and solve advanced electrical engineering problems.</p> <p>2. Locate literature relevant to a specific topic, understand and evaluate it, and apply the information.</p> <p>3. Conduct independent study to complete a research or a design project, and make effective use of the tools available for those studies.</p> <p>4. Possess in-depth knowledge of a specialty area within electrical engineering.</p> <p>5. Communicate effectively using both oral and written presentations.</p> <p>6. Understand the need for continued learning and professional development.</p> <p>7. Maintain awareness of current professional issues.</p> <p>8. Appreciate the importance of professional responsibility to society in such areas as the environment, social issues, and safety, and should be committed to ethical conduct in all areas.</p>
	Description and justification of the request	Cleaning up the language from the split in MS and PhD requirements.	<p>These changes to the program was voted on at Electrical Engineering faculty meetings and was approved by the full faculty of Electrical Engineering. One change replaces the qualifier exam which was previously given to students. The other change reduces the number of coursework hours required for PhD students. The first change allows the major professor for the student to determine the number of deficiency courses, if any, that need to be taken. The reduction in coursework hours is to allow the doctoral committee to balance the challenges of the doctoral research to the student's coursework.</p>
