	Program Costs	<p>We do not anticipate any new cost to implement and sustain the proposed program. No new faculty are required for program implementation. Courses in the program will be taught by existing faculty members in the Adult and Lifelong Learning and Higher Education programs. There are two tenure-track faculty members in the Higher Education program who started in Fall 2018 with a reduced teaching load. Their loads would increase next year to a typical 2-2 load, which would allow the program to offer additional 4 courses a year. One faculty member who is currently serving as a full-time administrator will be returning to a faculty role next year and will be teaching 4 courses as a regular teaching assignment. In total, this increases the teaching capacity of the Higher Education program faculty by 8 courses per year (4 per semester), not including the additional capacity for summer teaching. This Master of Education in Community College Leadership program will not only add to the number of professional master's students at the University of Arkansas and be of service to important educational institutions in our state and region, but it will also help ensure that Higher Education program faculty have full teaching assignments in the future. If the program grows beyond the anticipated enrollment projections, adjunct faculty will be hired to teach courses as needed.</p>	
	Library Resources	<p>There are no additional University of Arkansas library resources needed. The resources that students will need are already included in the collections and subscriptions related to the Higher Education and Adult and Lifelong Programs. Since the program is a web-based program and students are not on campus they will access resources through electronic means. Throughout the degree program, students will be able to access already existing resources, including the University of Arkansas Library's vast education holdings.</p>	
	Instructional Facilities	<p>Students will enroll in courses through Global Campus using web-based technology. No additional new facilities will be necessary.</p>	
	Faculty Resources	<p>No new faculty are required for program implementation. Courses in the program will be taught by existing faculty in Higher Education and Adult and Lifelong Education programs.</p>

	Description and Justification for this request	This request is for a new online Master of Education in Community College Leadership program. Based on the needs assessment, Arkansas community colleges estimate a minimum of 101 job openings in the next 2-5 years that would require or prefer this degree. In addition, they indicated that, at a minimum, 145 current employees would benefit from enrolling in this degree. In addition to Arkansas community colleges, we anticipate recruiting students from northeast Oklahoma, southwest Missouri, and southern Kansas, suggesting an even larger market for this degree. These institutions estimated the annual salaries of positions that would require or prefer this degree ranged from \$35,000-185,000. An approximate average salary for positions that require or prefer this degree was \$60,000. This proposed degree has a potential to improve the preparation of community college workforce and build their content expertise that will correspondingly improve their institutions and their local communities.

	Description and justification of the request	Minor wording changes that do not affect requirements.	Admission to Degree Program: All applicants must have a B.A. or B.S. in a basic or applied science. Applicants must submit transcripts, letters of recommendation, and the CEMB Applicant Profile. Applicants may also wish to present Graduate Record Examination scores for the Verbal and Quantitative tests, and the GRE writing instrument, to enhance their credentials. GRE scores are required to compete for special graduate school fellowships. For consideration for admission, a student must secure a sponsoring faculty member. Individual faculty may require additional materials (GRE, writing examples, etc.). The sponsoring faculty member will submit probable thesis subjects to the Program Committee prior to acceptance of the student. Once an applicant has been approved by the Program Committee, the program submits the application for admission to the Graduate School. Admitted and sponsored students will be responsible for the Graduate School's application fee unless paid by the sponsoring faculty member. When deemed appropriate by the Director and Program Advisory Committee, the Cell and Molecular Biology program will allow a qualified applicant to be admitted to complete research rotations through up to three designated research laboratories during his/her first semester enrolled in the Cell and Molecular Biology graduate program. Admission for research rotations is contingent up: 1) Stipend support has been guaranteed for the student during the rotation semester; and 2) the Cell and Molecular Biology faculty designated for the rotation have agreed to host the student during this period. After the rotation period, the student must obtain a faculty research sponsor. Changing the admission process to make the GRE optional. We are not aware of any specific form we need to complete. We checked all the grad.uark.edu forms we could find.

	Effective Catalog Year	Fall 2022	Summer 2023
	Scheduled Program Review Date	2022-2023	2029-2030
	Description and justification of the request	1. Updating admissions and degree requirements. 2. Correcting formatting and improving clarity. These changes only affect 15 credit hours of coursework. Two course tables were combined into one course table. In addition the course sequencing was edited (which gives the impression of more substantive changes than actually occurred). 3. Adding goals and objectives. The previous admissions information in the catalog pointed towards the website for information. This catalog update reflects what the program has been requiring and simply provides that detail here in the catalog. The changes are reflective of a longterm program self study conducted in collaboration with the University Council for Educational Administration (the primary EDLE professional association of which the University of Arkansas is an institutional member) and CPED (The Carnegie Project on the Education Doctorate). They are designed to improve the student cohort's exposure to experiences that help them navigate rigorous research experiences with site-based problems of practice.	The new dissertation methods course that was created last year was added to the program of study. Admissions changes include removing the GRE, moving from 3 to 2 letters of reference and requiring that 1 of them be from a supervisor, clarifying that the writing sample is "prompted" and changing from a specialist required to a master's. The GRE has been optional for several years and we do not find it a useful tool for evaluating working professionals (many who are long time school principals or superintendents by the time they apply to our program). The recommendation letter number is based on several years of experience with applications not moving forward because of delayed responses from letter writers and the value we place on hearing from someone who has supervised their work and can speak to their potential as a future school leader. The rest is simply clarifying details about the program for potential applicants.

	Select a reason for this modification	Revising an Approved Licensure Program-- (Cover Sheet, Section C)	Making Minor Changes to an Existing Certificate, Degree or Program (including 15 or fewer hours, admission/graduation requirements, Focused Studies or Tracks)
	Effective Catalog Year	Fall 2022	Fall 2023
	Description and justification of the request	<p>1. Clarifying admissions requirements. \n2. Making minor changes to the degree requirements. \n3. Adding program goals and learning outcomes. 1. The program is ensuring that the catalog clearly outlines admissions requirements to align with DESE standards and the protocol that was sent to DESE for approval. \n2. The licensure core is not changing. Proposed changes to courses will help the program better align with new DESE standards for EDLE district license. \n3. These changes were submitted to DESE in February 2021. Updating the catalog will ensure that the degree and admissions requirements in the catalog align with DESE requirements. Application submitted to DESE is uploaded in the attachments as supporting documents. DESE instructed EDLE program to complete Section B of their protocol. This allowed the program to explain in more detail the alignment with DESE required competencies and standards.</p>	<p>Moved where EDLE 6333 is displayed to more accurately indicate that it is not a core licensure course. Changed EDLE 680v specialist project for EDLE 699v seminar (the specialist project is no longer a program requirement). Minor changes to admissions process (moving from 3 letters of recommendation to 2 and requiring 1 of them be from a supervisor), clarifying the writing sample as a "prompted" writing sample). We add that the program is a cohort based program and provide specific application dates. The recommendation letter number is based on several years of experience with applications not moving forward because of delayed responses from letter writers and the value we place on hearing from someone who has supervised their work and can speak to their potential as a future school leader. The swap of 699v for 680v is because the seminar course is a better fit for what we are doing with students in that course since the project has not been required for some time. The rest is simply clarifying details about the program for potential applicants.</p>

Description and justification of the request	<p>1. Clarifying admission requirements in the catalog to make sure they match what was approved by DESE. \n2. Adding program goals and learning outcomes. \n3. Making minor changes to the foundations courses (removing EDFD class as an option and adding EDLE 5103 School Building-Level Finance course as an option in addition to EDLE 5003 School and Society). \n4. The program has been approved for standardized test exemption. We are clarifying in the catalog that GRE or MAT will only be required for students who do not meet minimum GPA requirements. \n These changes were submitted to DESE in February 2020 and approved by them in the letter to COEHP Dean received on July 7, 2020. Updating the catalog will ensure that the degree and admissions requirements in the catalog align with DESE requirements. Application submitted to DESE and approval letter are uploaded in the attachments as supporting documents. MED in EDLE leads to Building Level Administrator License. The content of EDLE 5073 is best taught across the rest of the EDLE curriculum rather than as an isolated course and so those learning outcomes will remain as program learning outcomes and students will experience them in other courses – most notable in the Analytical Decision Making Course (EDLE 5083).</p>

	Description and justification of the request	<p>1. Program of Study: Drop ECON 6623 Econometrics II from program of study and replace with EDRE 6123: Intermediate Quantitative Analytical Techniques for Education Policy. 3 Hours.\n2. Program of Study: Add EDRE 6463 to the requirements under subheading "Education Reform Fields:" EDRE 6463: Psychology of Education. 3 Hours.\n3. Program of study. Add the following language under subheading Education Reform Fields: "Student must complete five of the following six courses" 1. After discussion with ECON department, it was agreed that changes in the Econometrics II course modified it beyond the needs of EDPOPH students. The Intermediate Quantitative Analytical Techniques for Education Policy course is tailored specifically to EDPOPH needs in research methodology.\n2. Consistent with changes in education policy research, Psychology of Education was added to allow students a broader choice of fields.\n3. Necessitated by the addition of Psychology of Education as a field and the need to keep the degree requirement at 72 hours. We wish to leave unchanged the number of fields required.</p>	Changing admission criteria. The criteria were changed to lower the recommended GRE score from 304 to "over 300" and to note a quantitative GRE score above the 40th percentile as an indicator of preparation for the program's research methods sequence. These changes make EDPOPH admissions standards more accurate and more transparent.

	Description and Justification for this request	<p>We are adding a M.S. to the Environment Dynamics Ph.D. program to add flexibility for students and add a strong foundation for interdisciplinary research for those who wish to terminate at the masters level. As environmental concerns increase we need more and more individuals who are capable of addressing and solving the complex problems arising in the environment and within built environments. Adding the M.S. will give us more flexibility and allow us to train more individuals who will be capable of addressing these challenges at local, regional and state levels.</p>

	Description and justification of the request		GRE scores are now optional but strongly encouraged. We have changed this requirement to stay in line with the requirements of GSIE for graduate school.
ENDYPH	Select a reason for this modification	Changing CIP Code of an Existing Certificate or Major-(LON)	Making Minor Changes to an Existing Certificate, Degree or Program (including 15 or fewer hours, admission/graduation requirements, Focused Studies or Tracks)
	Effective Catalog Year	Fall 2020	Fall 2023
	Description and justification of the request	<p>We are changing the CIP to more closely match the interdisciplinary nature of ENDY. We are also making the wording of the program guidelines compatible with the proposed MS in ENDY program being submitted. The CIP change is necessary since the old code only represented a portion of our interdisciplinary program. Over the years we have a strong presence Anthropology, Biological Sciences, Agriculture, Sustainability, and Architecture. These diverse research interests have the environment at their center so Environmental Science seems like a better match for the program.</p>	<p>We have now made the GRE optional, but strongly encouraged. The requirement has been dropped in line with the GRE requirement being dropped by GSIE</p>

	Description and justification of the request	Substituting ENGL 5453 Technical Writing in Healthcare Settings for NURS 5403 Scholarly Writing Made the following additions and changes to requirements and descriptions of the program Added: The semester of entry can be spring, summer, or fall. Completion of a nationally accredited baccalaureate or masters degree program in nursing replaces Completion of a nationally accredited professional degree program in nursing A 3.0 cumulative GPA on the last 60 credit hours of attempted coursework in previous nursing program. Applicants with GPA below will be considered by the Graduate Admissions Committee on an individual basis with possible probationary status. replaces A 3.0 cumulative GPA on the last 60 credit hours of attempted coursework in previous nursing program the ENGL course is prepared to teach students the mechanics of technical writing Changed wording is easier for students to understand requirements in Catalog	Changed numbers of letters of recommendation needed from 2 to 1. Upon review, having 1 letter expedites admissions and having 2 is not necessary to evaluate students. clarified admissions timeline language. clarity Replaced NURS 579V with NURS 5703 NURS 579V is an independent study. The work done in that was being done similarly for groups of students at a time, thus creating a course (NURS 5703) is more reflective of what is actually occurring with students academically. Clarified that comprehensive exams are part of NURS 5703 and NURS 600V. Clarity adding language to the catalog about how required comprehensive physical exams are handled. provides clarity to students about factors that could influence degree progression.

	Scheduled Program Review Date	2021-2022	2028-2029
	Description and justification of the request	Clarify program outcomes based on annual program review, input from faculty, and course reviews. Results briefed and coordinated through program and department faculty. Results of normal annual accreditation review and continuous improvement and assessment process.	Changed GPA graduation requirement to those courses applied to the degree. Updated language regarding English Language Proficiency requirement to adhere to Graduate School Policy Currently, if a student repeats a course, they are penalized twice. It also uses transferred courses from other programs which have no effect on operations management knowledge. Change suggested by the associate dean of grad school to match actual practice for students in this situation.
